EXPLORATION AND DEVELOPMENT ACTIVITIES

Austria

WOLFSBERG LITHIUM PROJECT

Drilling

No additional drilling took place during Q3/2022.

In an effort to increase the Wolfsberg Project's resource base, the Company is preparing the relevant approvals required for the Zone 2 drilling program which has been lodged in Q3/2022.

Definitive Feasibility Study (DFS)

During the quarter, the Company continued to work with their DFS team based in Europe, South Africa, and Canada to progress all aspects of the DFS. In Q3/2022 the appointed international DFS team continued to advance the financial planning work for the complete Wolfsberg Project including the underground mine, infrastructure, ore concentrator facilities located underground and on surface, as well as the chemical conversion plant to produce battery grade lithium products.

EUR are closely monitoring new identified and validated risks for European markets, including increasing inflation rates, unexpected high prices for consumables, especially for energy (gas and electricity) and chemical reagents, and the supply chain for these critical materials. These risks could culminate in national and international shortages for the executable project layout within Europe and are being reviewed and assessed to be integrated into the final DFS. This process may delay the anticipated completion date for the DFS to the end of the first quarter of 2023.

During the quarter, the Company's independent metallurgic consultants, Dorfner Anzaplan (**Dorfner**), was engaged with an additional task of optimizing the concentrator flow to increase the spodumene concentrate levels with the aim to reducing energy consumption for all further processing.

Hydrogeology

The Company continued its hydrogeology monitoring program during Q3/2022, collecting the data

and interpretations for integration into the DFS.

All hydrogeological data continues to be stored and secured within the Company's database.

The preparation work by SRK, and the geological consultant, GEO Unterweissacher GmbH (**GEO Unterweissacher**), continues to ensure in-hole hydrogeological test work has been completed appropriately and can continue in the future.

Data from the above activities is fed into a water measuring database from which an annual report is produced.

Environmental

During Q3/2022, the Company commenced work with Hasslinger & Nagele in Vienna (**Hasslinger**) on the application process which is to be lodged with the relevant authorities once the DFS is completed. Hasslinger's engagement includes facilitation of numerous discussions with municipal, state and federal authorities to introduce the project rollout and the integration of the DFS findings into the environmental approvals process.

Monitoring of water flows and quality from the mine is continuing.

Product Marketing

The strategy for the Company remains unchanged and focuses on the supply of lithium hydroxide to the nascent lithium battery plants of Europe. During the quarter, the Company entered into a non-binding memorandum of understanding with European auto manufacturer BMW AG (**BMW**) to secure EUR's first long term offtake of battery grade lithium hydroxide. EUR and BWM are currently negotiating binding agreements.

Horizon 2020

In Q3/2022, the Company's 100% owned subsidiary, ECM Lithium AT GmbH (**ECM**), continued work on the infield and underground geophysical survey program for which reporting is required in respect to ECM's participation in the European Union funded Horizon 2020 - GREENPEG project.

The Company continued to work proactively in the already approved and funded Horizon 2020 LithRef program.

Continued participation shows the Company's abilities and eligibility to contribute with EU-level support to the sustainable supply of battery grade lithium, sourced and produced in Europe.

COVID-19

During the quarter, Europe experienced fluctuating infection rates, there were reports that the government of Austria may consider the introduction of some restrictions to avoid increased infections during the upcoming colder seasons in Q4/2022 onwards. European restrictions may continue to impact the Company's operational activities at its Wolfsberg Project. The Company continues to monitor and address the changing circumstances with suitable COVID-19 measures implemented.

Other Business

The Company continues to develop technical solution to incorporate recycled lithium-ion battery materials into the flowsheets for final lithium carbonate and hydroxide (**LiOH**) production. Pursuant to a letter of intent, this project is technically supervised by a research group from the University of Graz.

The Company continues to work with Tunley Engineering to assess the Wolfsberg Project eligibility to achieve Carbon Neutrality.

EV Resources

The Company previously announced that it had entered into a Collaboration Agreement with EV Resources Limited (formerly Jadar Resources Limited) (ASX: EVR) (**EVR**) and an agreement to acquire a 20% interest in EVR's Austrian Lithium assets from their JV partner (**EVR Acquisition**) (refer ASX announcement 11 May 2021).

EVR holds an 80% interest in Subsidiary Jadar Lithium GmbH (**Jadar Lithium**), the holder of the Weinebene and Eastern Alps Projects which lies 20km to the east of the Company's Wolfsberg Project (refer figure 1).

Figure 1 – Weinebene Lithium Project Location

On 8 September 2022, EVR released an announcement confirming that high-grade lithium assays have been received from sampling undertaken at the projects in Austria.

Australia

E47/4144

E47/4144 is progressing through the WA Mining Act regulatory application process and has cleared the Native Title process. The Company is continuing discussions with a stakeholder and remaining

objector to negotiate access with respect to areas of existing or intended infrastructure.

Ukraine

DOBRA AND SHEVCHENKIVSKE PROJECTS

On 4 November 2021, the Company announced it had entered into binding agreements under which EUR will acquire European Lithium Ukraine LLC (formerly Petro Consulting LLC) (**European Lithium Ukraine**), a Ukraine incorporated company that is applying (through either court proceedings, public auction and/or production sharing agreement with the Ukraine Government) for 20-year special permits for the extraction and production of lithium at the Shevchenkivske project and Dobra Project in Ukraine (Figure 2), from Millstone and Company Global DW LLC (**Millstone**)(**Millstone Transaction**).

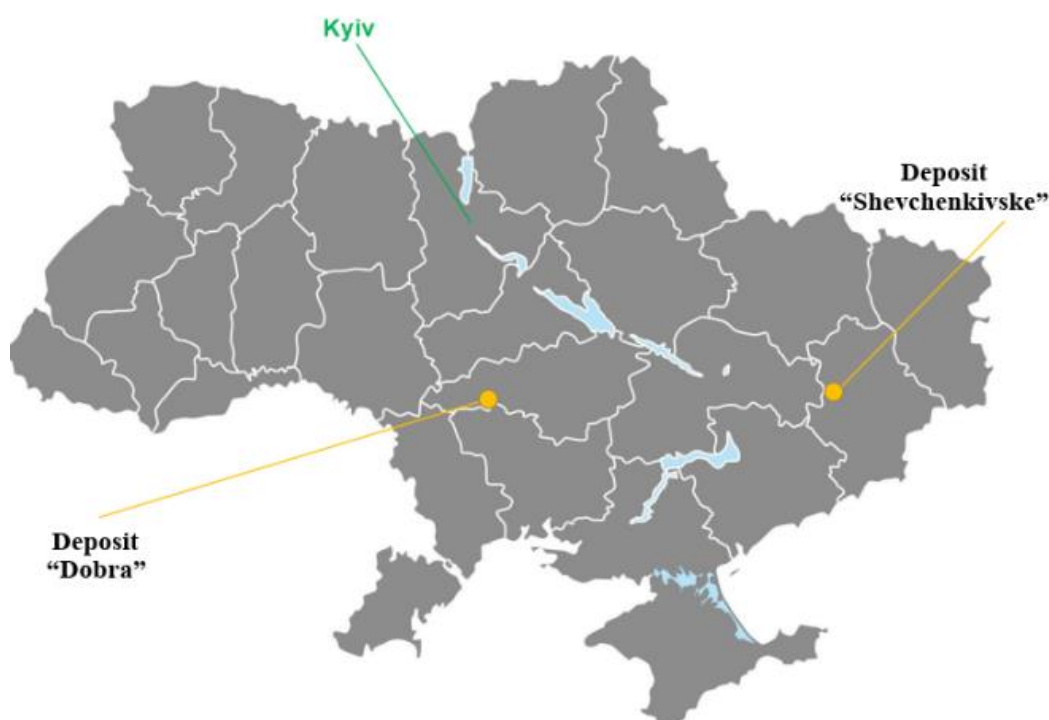

Figure 2 - Location of the deposit Shevchenkivske and Dobra in Ukraine

During the quarter, the Company did not conduct desktop or fieldwork on the assets associated with the Millstone Transaction. The Company continues to monitor closely the conflict in Ukraine and will continue to assess when it will become safe to commence in-country exploration activities, especially with the larger Dobra asset in the West of the country.

This announcement has been authorised for release to the ASX by the Board of the Company.
